The Department, established to impart analytical and application skills in various fields of Civil Engineering, has been transforming young people into professionals. Civil Engineering students are exposed to various fields such as Structural Engineering, Construction Technology and Management, Water Resources Engineering, Environmental Engineering, Geotechnical Engineering, Transportation Engineering and many more that enable them to pursue a professional career or higher education of your choice. The Department of Civil Engineering is one of the best in the area, with highly qualified personnel and excellent infrastructure. The campus is fully networked with high-speed Internet connectivity, giving our students and faculty an advantage over their counterparts at other institutions.

I hope the best and prepare for the worst.
