ABOUT THE CONFERENCE

This conference is on Electronics, Communication and Computing. (ECC-2020) is planed to be conduct in the month of March 2020.

ECC, aims at bringing together Researchers, Scientists, Engineers, Research Scholars, Industrial Participants and budding students all around the world to a common platform. To share this experiences, new ideas, research findings on all aspects of Electronics, Communication and Computer Engineering. The researchers will present the state of the art of expansion and technical education covering wide range of topics in the fields of Engineering.

The conference will be complete, concise, clear and cohesive in terms research related to Electronics, Communication and Computer Engineering.

The motto of the conference is to provide a platform to researchers and practitioners from both academia as well as industry to meet the share cutting edge development in the field.

OBJECTIVE OF THE CONFERENCE

The primary goal of conference is to promote research and development activity in Computing, Electronics and Communication.

Another goal is to promote scientific information interchange between Researchers, Developers, Engineers, Students and Practitioners working in and around the world.

Practically Electronics and communications has become part of our life and we are inseparable from anything remotely connected to it; from pocket radios computers, mobile, televisions to satellites, and aircrafts everything involving electronics and communication is indispensable and hence the scope of an electronics and communication engineer is manifold in these modern times.

In other side Research-computing resources can provide advantages for all institutions, regardless of research intensity. IT can enable data-intensive research with the provision of the specialized staff and infrastructure that facilitate collaboration, efficiency, and data storage.
